

# Made from *Minerals*, not *Fillers*.

Rod's Loose Mixes are weather-resistant, highly palatable blends formulated to address the specific mineral deficiencies found in Southern Australian pastures.

## Why Choose Rod's Loose Mixes?

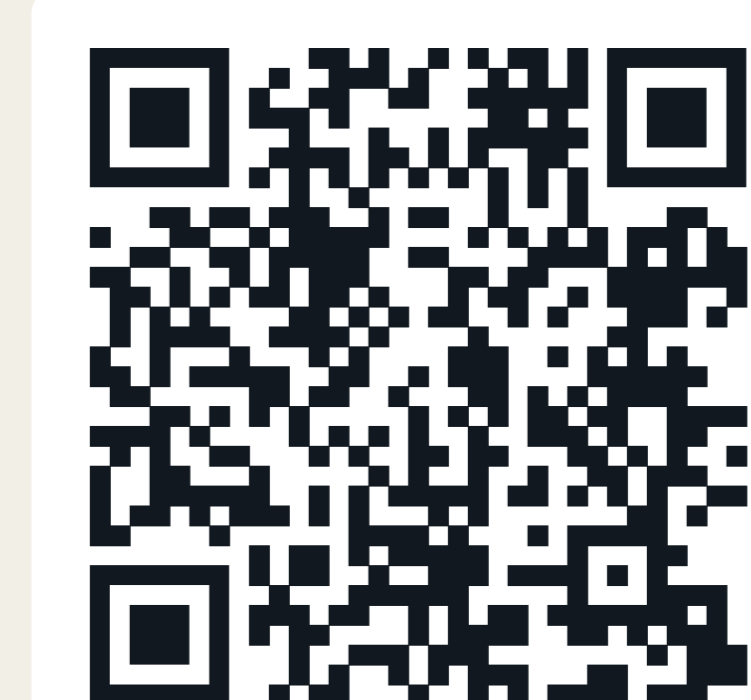

- **Tailored Nutrition:** Formulated in collaboration with leading nutritionists to target local deficiencies.
- **Optimised Ca:Mg Ratios:** Carefully balanced ratios to ensure efficient absorption and prevent metabolic issues like grass tetany.
- **No Fillers:** Free from unnecessary energy and feed ingredients used as bulk—just the minerals your stock need.
- **Flexible Feeding:** Can be fed ad lib in troughs or integrated with other supplementary feeds.

FEED TYPE	LOOSE LICK	COMMON APPLICATION
<b>Sheep Mineral Program</b>
